About the Workshop

Artificial Intelligence is reshaping every industry, and the students who learn to use it well will lead the next decade of work. This hands-on, single-day program walks students through the modern AI toolkit – from foundational concepts to real tools used by professionals today – so they leave with practical skills for productivity, innovation, projects and placements. No prior AI experience is required.

Key Highlights

- Intro to AI & GenAI

- Industry AI Tools

- Prompt Engineering

- AI for Placements

- Resume Building

- AI Productivity Hacks

- Completion Certificate

- Career Opportunities

Who Can Attend

- B.Tech / BE Students

- MCA / BCA Students

- MBA Students

- Anyone curious about AI

About MandowI Tech

MandowI Tech builds software and AI solutions for real businesses, and brings that same industry experience into the classroom through skill development programs.
